

Baron mixer M110

Weight(kg)	Height(mm)	Width(mm)	Length(m)	Hand arm vibration	Noise(db)
100	1080	680	970	n/a	

EACH TIME BEFORE USING MACHINE

This machine should only ever be used by a trained and competent person.

Upon acceptance, please check the machine has in no way been damaged in transit and works, and each time prior to use. If you have any questions or doubts, please contact us, also in the event of breakdown or damage.

Please check that all safety mechanisms and switches are intact and working correctly.

Please check every day that all belts, bearings and moving parts are in good condition because this could lead to something breaking and causing injury.

Prior to using the mixer ensure that all paddles are set reasonably close to the sides of the drum to maintain an even mix and avoid leaving excess residue.

USING THE MACHINE

To start the mixer, press the on button and the paddles will start to turn. Load the machine from the top into the gauze. Once the mix is ready, pull the hatch lever at the bottom of the drum to allow the mix to slide down the chute. To stop the mixer, press the off button. Keep hands away from the paddles at all times. If the machine experiences power failure during the mix, use fewer, preferably one lead. If that still does not resolve the problem, it is likely that the mixer is being overloaded. Consider hiring a larger machine (M200) or halve the mix.

AFTER USING AND PRIOR TO RETURNING THE MACHINE

Please ensure that the machine is unplugged and kept in a safe place.

An off-hire will never be arranged at the beginning of the hire period. Please call the office and arrange collection as soon as you know when the machine/machines will no longer be required.

Please make sure the machine is returned in a fit and clean state to avoid charges.

If multiple machines are being collected, please have them placed neatly together, ready to collect because time may be charged if we have to search or wait for equipment. Items not available for collection will remain on hire and additional collection charges will apply. If the machine is to be collected by a carrier, please ensure it's strapped securely to the pallet using the straps that it arrived with and is left somewhere obvious and preferably arrange for someone to be responsible for supervising the collection.

All information above is provided for guideline purposes only. For more accurate and reliable information please refer to the manufacturer.
