EACH TIME BEFORE USING MACHINE

This machine should only ever be used by a trained and competent person.

Upon acceptance, please check the machine has in no way been damaged in transit and works, and each time prior to use. If you have any questions or doubts, please contact us, also in the event of breakdown or damage.

Please check that all safety mechanisms and switches are intact and working correctly.

Please make sure that the floor you're about to prep is clear of all foreign objects that could cause damage to the machine or operator. This must be completed every time before using the machine.

Please check every day that all belts, bearings and moving parts are in good condition and that the blades do not catch on the casing because this could lead to something breaking and causing injury. The machine can be used as a stand alone or with one or more hoses that attach to the outside of the machine, hired separately. Multiple fans will be needed if more than 2 hoses are required.

AFTER USING AND PRIOR TO RETURNING THE MACHINE

Please ensure that the machine is unplugged and kept in a safe place.

An off-hire will never be arranged at the beginning of the hire period. Please call the office and arrange collection as soon as you know when the machine/machines will no longer be required.

Please make sure the machine is returned in a fit and clean state to avoid charges.

If multiple machines are being collected, please have them placed neatly together, ready to collect because time may be charged if we have to search or wait for equipment. Items not available for collection will remain on hire and additional collection charges will apply. If the machine is to be collected by a carrier, please ensure it is left somewhere obvious and preferably arrange for someone to be responsible for supervising the collection.

All information above is provided for guideline purposes only. For more accurate and reliable information please refer to the manufacturer.
