

**Petrol floor saw**

Weight(kg)	Height(mm)	Width(mm)	Length(m)	Hand arm vibration	Noise(db)

**EACH TIME BEFORE USING MACHINE**

This machine should only ever be used by a trained and competent person.

Upon acceptance, please check the machine has in no way been damaged in transit and works, and each time prior to use. If you have any questions or doubts, please contact us, also in the event of breakdown or damage.

Please check that all safety mechanisms and switches are intact and working correctly.

Please make sure that the floor you're about to prep is clear of all foreign objects that could cause damage to the machine or operator. This must be completed every time before using the machine.

Please check everyday that all belts, bearings and moving parts are in good condition because this could lead to something breaking and causing injury.

**USING THE MACHINE**

Make sure the blade is on correctly and the nut tightened. The blade should be wound all the way up and not touching the floor. Make sure no part of your body goes near the blade at all times. To start the machine pull the revs lever to the lowest setting and turn the choke off. Twist the on/off button to on. When all this is complete pull the recoil chord until the machine starts to fire. After 10 seconds put the choke over. When the machine is up to power turn the water tap on to keep dust to a minimum. Now slowly lower the blade to desired cutting depth and let the machine do the work.

**AFTER USING AND PRIOR TO RETURNING THE MACHINE**

Please ensure that the machine is unplugged and kept in a safe place.

An off-hire will never be arranged at the beginning of the hire period. Please call the office and arrange collection as soon as you know when the machine/machines will no longer be required.

Please make sure the machine is returned in a fit and clean state to avoid charges.

If multiple machines are being collected, please have them placed neatly together, ready to collect because time may be charged if we have to search or wait for equipment.

All information above is provided for guideline purposes only. For more accurate and reliable information please refer to the manufacturer.
